the soldier in the mine. the soldier in minecraft

I know this is one of those game that awards 0000\u2019s of Achievements for little work but if you\u2019re going to add some game play fix the issues. I don\u2019t rate these \u201cgames\u201d as you get what you pay for but this one struck a nerve.

You will have to be near as damn it pixel perfect to stay alive, which would be fine if;
Deadly objects didn't have a larger invisible kill box than the item,
You didn\u2019t get stuck on the corner of ledges,
You didn\u2019t get stuck on the corner of movable objects,
Landing on any movable object with horizontal momentum moves both of you together as if the object in now on soap,
By the time Level 11 fades in you are dead,
All of the above have been seen by the developer as it shows them all in the only walkthrough guide on the Community Hub, Authored by the Developer! Great play testing.

Their I\u2019ve had my rant, I\u2019ve got my achievements, in 28min if you were wondering (including time it was minimised as the boss walked back n forth), get if for achievements, ON SALE and try not to get frustrated, cos no one cares, you just paid for 1215 Achievements that have now lost all meaning as you did F all worthwhile to obtain them.. I know this is one of those game that awards 0000\u2019s of Achievements for little work but if you\u2019re going to add some game play fix the issues.
